# Uralkali today

Uralkali is a leading vertically integrated producer of potash.

Uralkali's production is located at the Verkhnekamskoye potassium and magnesium salt field at Berezniki and Solikamsk, Perm Region, the world's second largest field in terms of ore reserves.

The company is one of the world's largest potash producers and controls its entire production chain, from potash ore mining through to the supply of potash to customers.

Uralkali products are distributed through a global sales network which combines access to all the main regions of potash consumption.

Uralkali exports its products through Uralkali Trading SIA and its subsidiaries to more than 70 countries. Uralkali Trading has representative offices in Europe, Latin America, India, China, Southeast Asia and the United States. UFCL supplies URALKALI products to African region.

# Assets of Uralkali

The Company's mining operations comprise five mines, six potash plants and one carnallite plant.

Baltic Bulk Terminal  
(St. Petersburg city)

Uralkali Trading SIA

Warehouse facilities with a capacity  
of over 1 million tonnes

A fleet of 8 thousand  
specialised mineral railcars

# Products

Uralkali enriches potash ore using the crystallization and flotation methods

Uralkali's products comply with the best international quality standards. Independent inspection is arranged at each loading port to ensure the highest quality of our products.

Uralkali has been recognized as an Industry Stewardship Champion 2020 by the International Fertilizer Association (IFA), for the Company's outstanding achievements in product stewardship.

# Drip KALI

MOP 0-0-62  
for irrigation systems

Available package:

## Chemical Analysis

Component	Typical, %	Guarantee, %
Water soluble potash (expressed as K <sub>2</sub> O)		62 min
Insolubles in water	0.01	
Moisture content		0.5 max
Granulometric composition: less than 2 mm	100	

- 100% water-soluble
- Maximum concentration of K<sub>2</sub>O
- Compatible with all types of water soluble fertilizers
- Safe for irrigation system
- No heavy metals
- No dust
- 100% friability

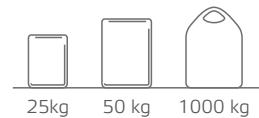

- Stabilizes water sensitive clays and shales
- Allows producing well-killing fluids of up to 1170 kg/m<sup>3</sup> density
- Compatible with most drilling fluid additives
- High chemical purity
- 100% solubility in water

# PETROKALI

Moisture content		0.5 max
Granulometric composition less than 2 mm	100	

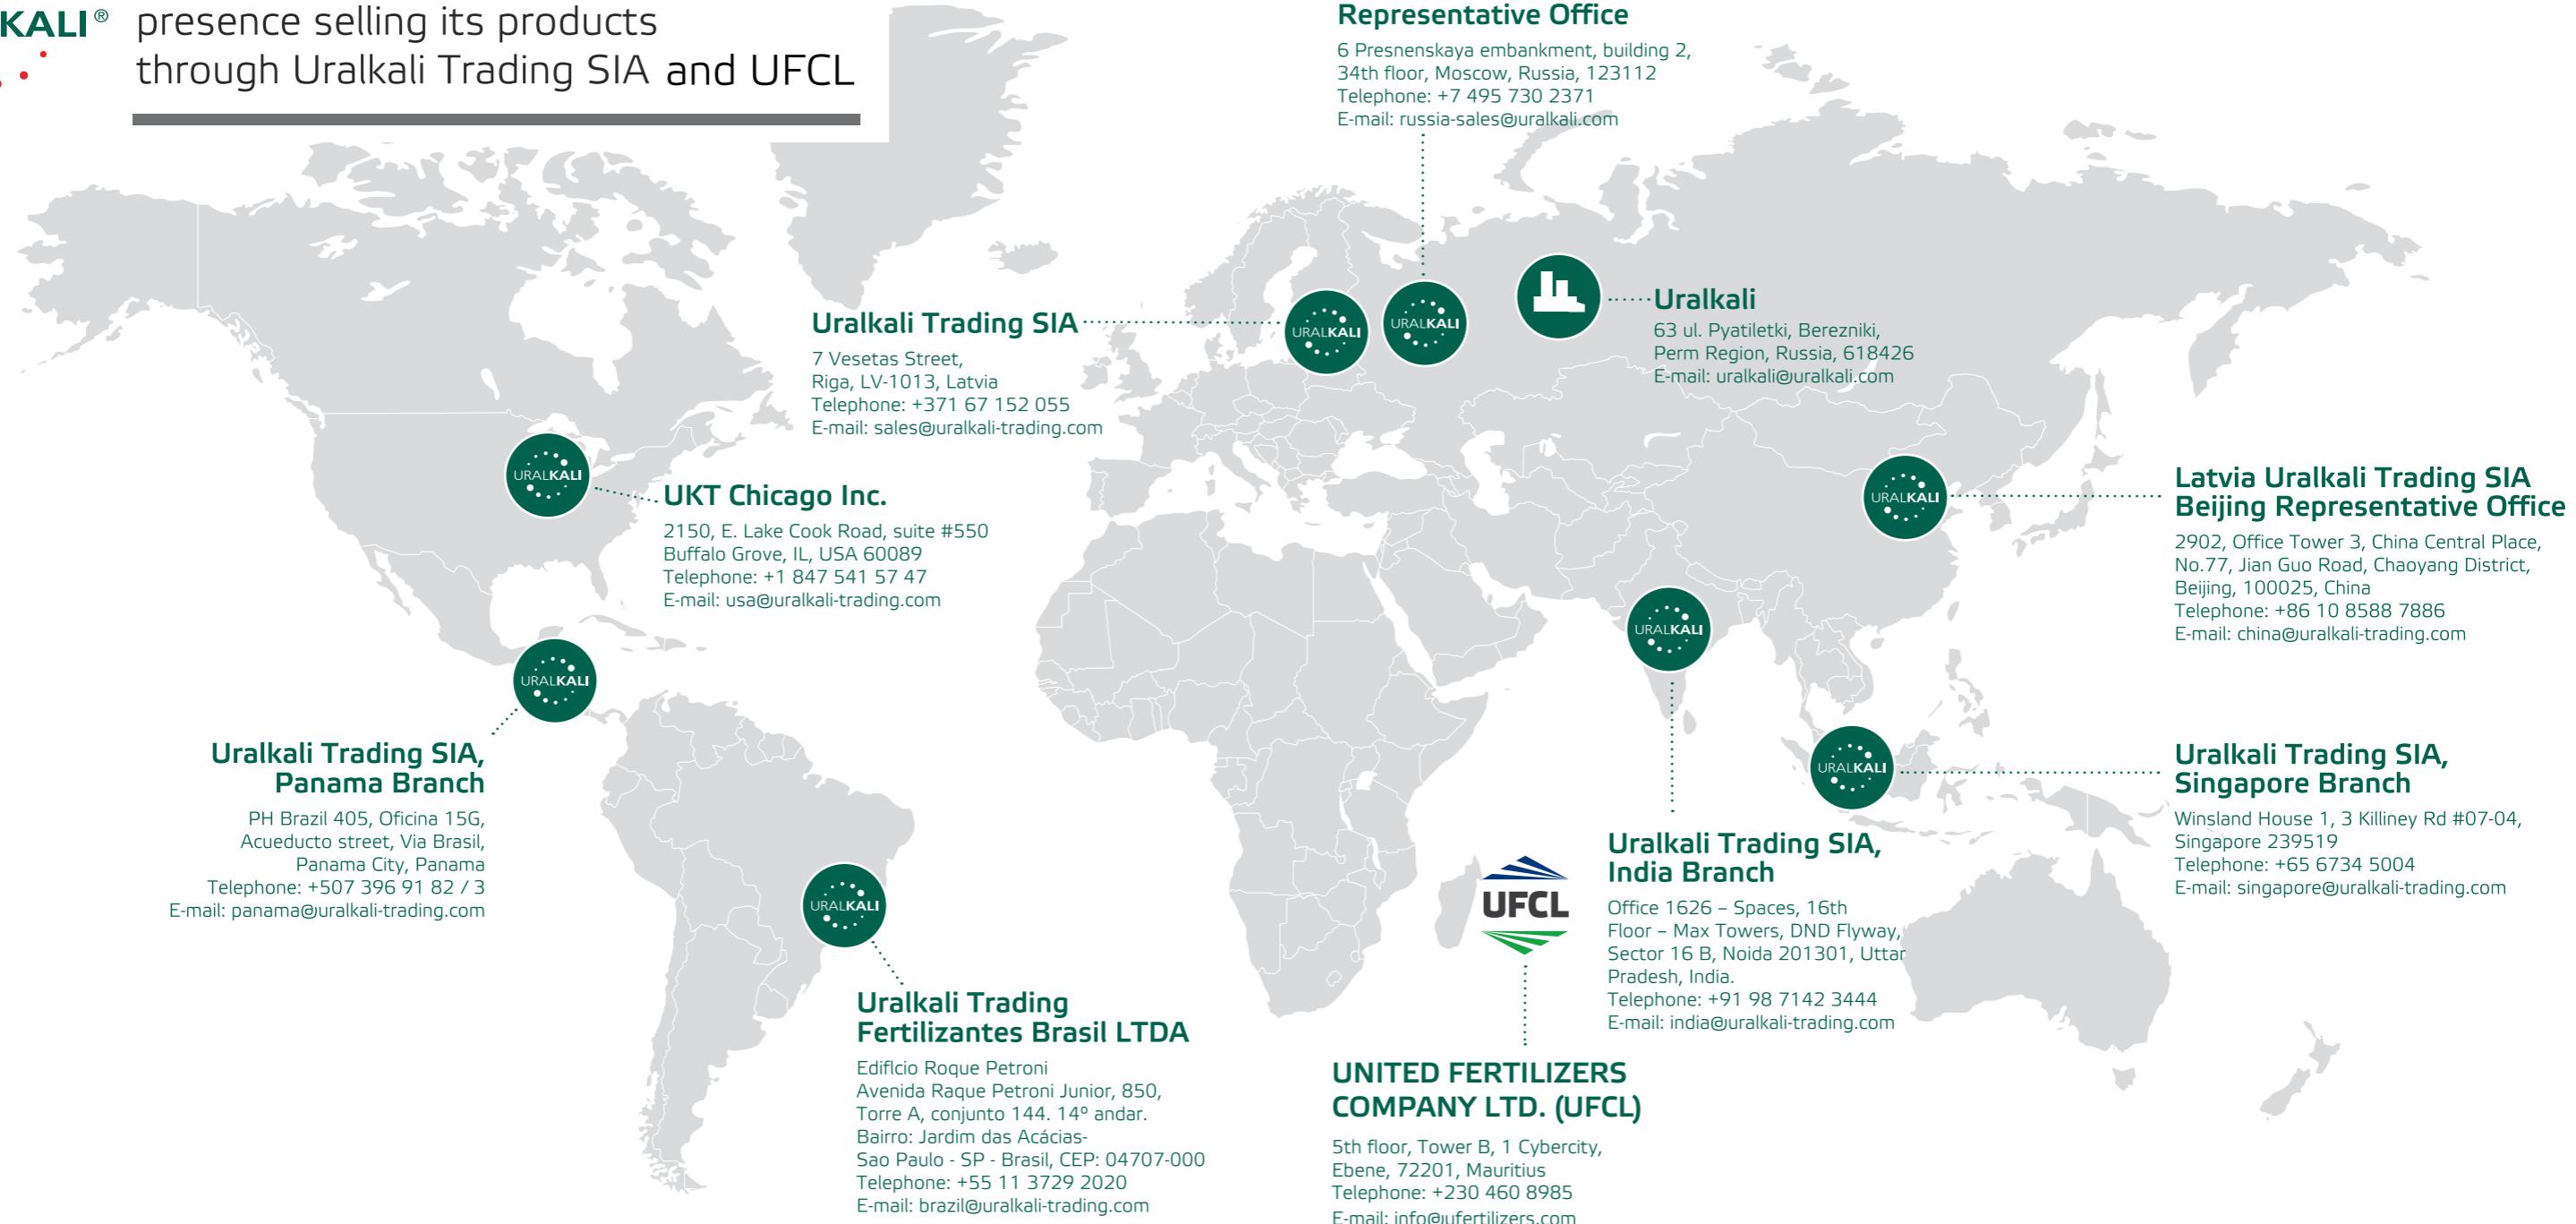

- High content of potassium (K) – 51.5%
- Uniform particle size
- No heavy metals
- 100% friability
- Certified for animal nutrition
