

Uralkali—Nourishing the Earth

1H 2010 IFRS financial results and potash market outlook

Conference Call Presentation
September 3, 2010

Disclaimer

This presentation has been prepared by JSC Uralkali (the «Company»). By attending the meeting where the presentation is made, or by reading the presentation slides, you agree to the following limitations and notifications.

With respect to any information communicated by the Company, its agents or its representatives (including its directors, officers, employees, members, attorneys, advisors and any affiliates) to you or your agents or representatives (including any directors, officers, employees, members, attorneys, advisors and affiliates), directly or indirectly, whether in written, oral, visual, electronic or any other form, during or constituting the whole or part of this presentation or any presentation meeting or any conversation or discussion relating to or held in connection with this presentation, or any opinion expressed in respect of such information (the "Information"), such Information may not be reproduced, redistributed, passed on or otherwise disseminated to any other person, directly or indirectly, whether in written, oral, visual, electronic or any other form, for any purpose.

The Information communicated does not constitute or form part of, and should not be construed as, an offer, solicitation or invitation to subscribe for, underwrite or otherwise acquire, any securities of the Company or any member of its group nor should it or any part of it form the basis of, or be relied on in connection with, any contract to purchase or subscribe for any securities of the Company or any member of its group, nor shall it or any part of it form the basis of or be relied on in connection with any contract or commitment whatsoever. Any person considering the purchase of any securities of the Company or any member of its group must inform himself or herself independently before taking any investment decision. The Information communicated has been provided to you solely for your information and background and is subject to amendment. Further, the Information communicated has been compiled on the basis of information from a number of sources and reflects prevailing conditions as of its date, which are subject to change. The medium through which the Information is communicated constitutes neither an advertisement nor a prospectus. The Information communicated has not been independently verified. The Information communicated is subject to verification and amendment without notice and the Company is not under any obligation to update or keep current the Information.

Accordingly, no representation or warranty, express or implied, is made or given by or on behalf of the Company or any of its directors, officers, employees, members, attorneys, advisors, affiliates or any other person as to the correctness, accuracy, currency, completeness, adequacy, usefulness, reliability, fairness or otherwise of the Information communicated, and any reliance you place on such Information will be at your sole risk. Neither the Company nor any of its directors, officers, employees, members, attorneys, advisors, affiliates or any other person accepts any liability whatsoever for any loss howsoever arising from any use of the Information communicated.

To the fullest extent permitted by applicable law, the Company shall not be liable for any compensatory, punitive, special, consequential or other damages, any loss of income or revenue, any loss of business, any loss of anticipated savings, any loss of goodwill, or any other losses, liabilities, expenses or costs of whatever nature arising from or attributable to your access to, or inability to access, or reliance on Information even if the Company has been advised of the possibility of such damages, losses, liabilities, expenses or costs.

Some of the Information may constitute projections or other forward-looking statements regarding future events or the future financial performance of the Company. These statements involve numerous assumptions regarding the present and future strategies of the Company and the environment in which it operates and will operate in the future and involve a number of known and unknown risks and other factors that could cause the Company's or its industry's actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. Accordingly, the Company provides no assurance whatsoever that its or its industry's actual results, levels of activity, performance or achievements will be consistent with the future results, levels of activity, performance or achievements expressed or implied by such forward looking statements. Neither the Company nor any of its directors, officers, employees, members, attorneys, advisors, affiliates or any other person intends or has any duty or obligation to supplement, amend, update or revise any of the forward-looking statements contained herein to reflect any change in the Company's expectations with regard thereto or any change in events, conditions or circumstances on which any such statements are based.

Multiple factors could cause the actual results to differ materially from those contained in any projections or forward-looking statements, including, among others, potential fluctuations in quarterly or other results, dependence on new product development, rapid technological and market change, acquisition strategy, manufacturing risks, volatility of stock price, financial risk management, future growth subject to risks of political instability, economic growth and natural disasters, wars and acts of terrorism.

Agenda

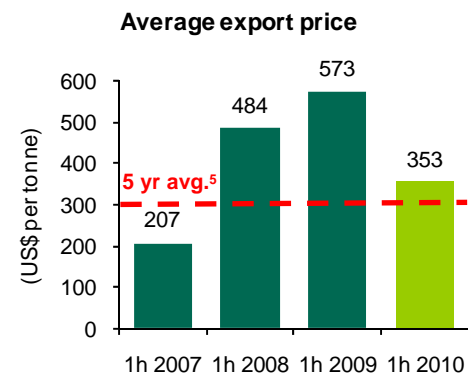

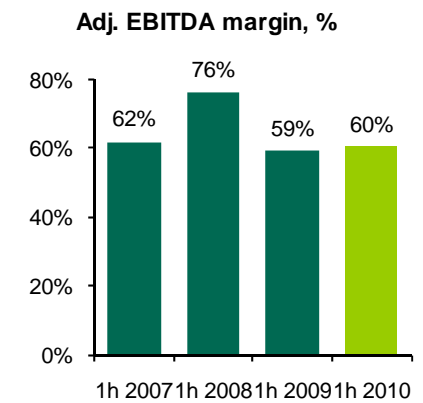

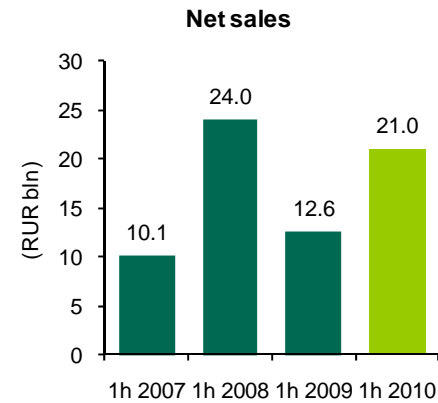

- **1H 2010 Financial Results**
- **Potash Market Outlook**

1H 2010 – Key Highlights

IFRS Financial Results

(RUR mln)	1h 2009	1h 2010	Change %
Production (million tonnes)	1,1	2,4	113%
Sales (million tonnes)	0,9	2,7	200%
% of domestic sales	30%	12%	
Gross Sales	13,873	27,384	97%
Net Sales ¹	12,553	21,035	68%
EBITDA ² adjusted Margin ³	7,426 59%	12,695 60%	71%
Net Profit	4,465	8,420	89%
Operating Cash Flow	1,407	8,945	536%
Capex Expan/Mainten. proportion	5,982 50/50	6,144 56/44	-11%
Debt	12,980	14,600	12%
Cash	9,911	5,093	-49%
Net cash/(Debt) ⁴	-3,069	-9,507	
Average exchange rate, RUR/USD	33,27	30,05	

Key Considerations

Potash sales structure, 1h 2010

Notes:

1. Based on adjusted sales (sales net of freight, railway tariff and shipping costs)
2. Adjusted EBITDA is calculated as Operating Profit plus depreciation and amortization and does not include mine flooding costs
3. EBITDA Margin is calculated as EBITDA divided by Net Sales
4. Net cash position is calculated as cash and cash equivalents (including deposits) minus bank loans
5. 5 year average price level was calculated based on average sales prices as for 2005-2009

Costs

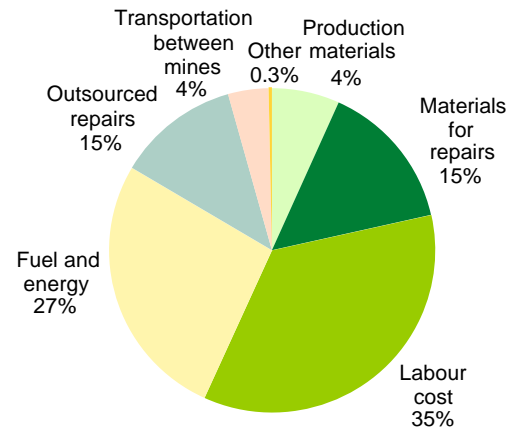

Cash COGS

Distribution costs

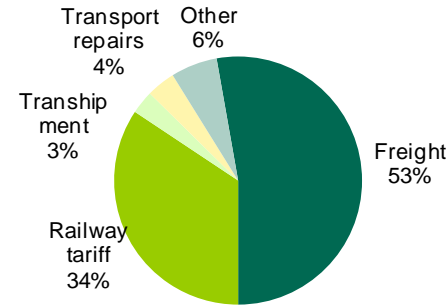

Potash cash COGS¹

Cash COGS² structure, 1h 2010

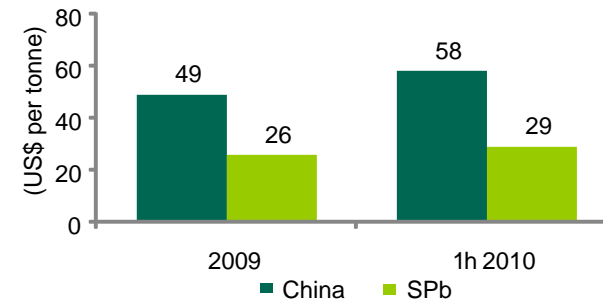

Distribution cost structure 1h 2010

Effective freight rates⁴

China and SPb effective railway tariff⁵

- Low cost producer within potash industry
- Fixed vs. variable cash COGS structure 60/40³ is preferable to production volume growth
- Potash Cash COGS³ 1h 2010 – 52US\$ per tonne vs. 54US\$ per tonne in 1h 2008
- Favourable effect of RUR devaluation

- Av. freight rates returned to historic “pre-crisis” level

Notes:

1. Total cost of sales for potash sales (Note 7. Segment reporting) less depreciation in COGS (Note 14). Depreciation is divided proportionally btw. Potash and Other sales. (Cash COGS 2009 – 56US\$ per tonne vs. 80US\$ per tonne in 2009)
2. Cost of goods sold less depreciation
3. For 100% utilization rate

Notes:

4. Effective freight rates are calculated as freight cost divided by freight volumes
5. Effective railway tariff includes both loaded and empty railcars fares

Cost Cutting Programmes

Productivity Increase

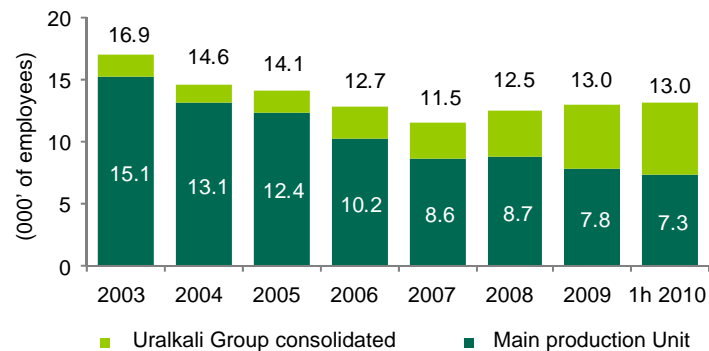

As % of cash COGS

As % of cash G&A¹

Headcount, (period average)

Potash sector labour rates (2009)

- Low labour cost compared to other potash producers
- Target – 6,000 employees in main production unit

Source: Uralkali, British Sulphur Consultants

Notes:

1. General and administrative expenses less depreciation and amortization

Power Generation Programme

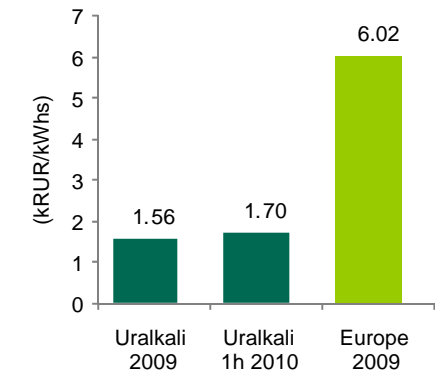

Fuel and energy cost, 1h 2010

Gas tariff²

Effective electricity tariff³

- After full implementation, expected efficiency gain is 50 RUR per tonne of potash production³

Notes:

2. Average natural gas and electricity prices charged in 2009 to final industrial consumers in UK, Germany and Spain per www.epp.eurostat.ec.europa.eu, converted to RUR at a US\$/RUR exchange rate of 31.75

3. We see the effect of the programme as the difference between the costs of purchased electricity and the cash costs of generated electricity, based on the assumptions that the company will operate at full capacity and the price increase will be 25% and 15% for gas, and 11% and 12% for electricity in 2010 and 2011 respectively

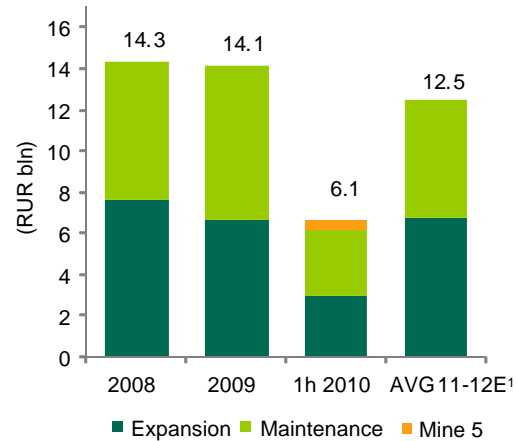

Capex and Cash Flow

Capex

Capacity Addition Program

Capex Evolution

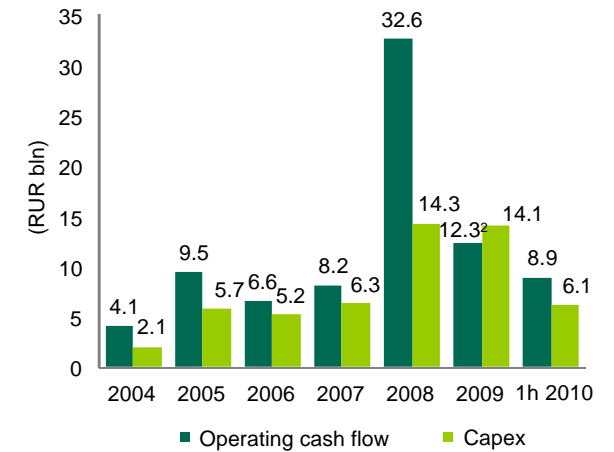

Notes:

1. Mine 5 is not included

Cash Flow

Oper. Cash Flow vs. Capex

Dividends Payout Ratio

Notes:

2. Operating Cash Flow for 2009 was adjusted for the amount of compensations related to Mine-1 flooding, paid in 2009 (7.8 bln RUR)

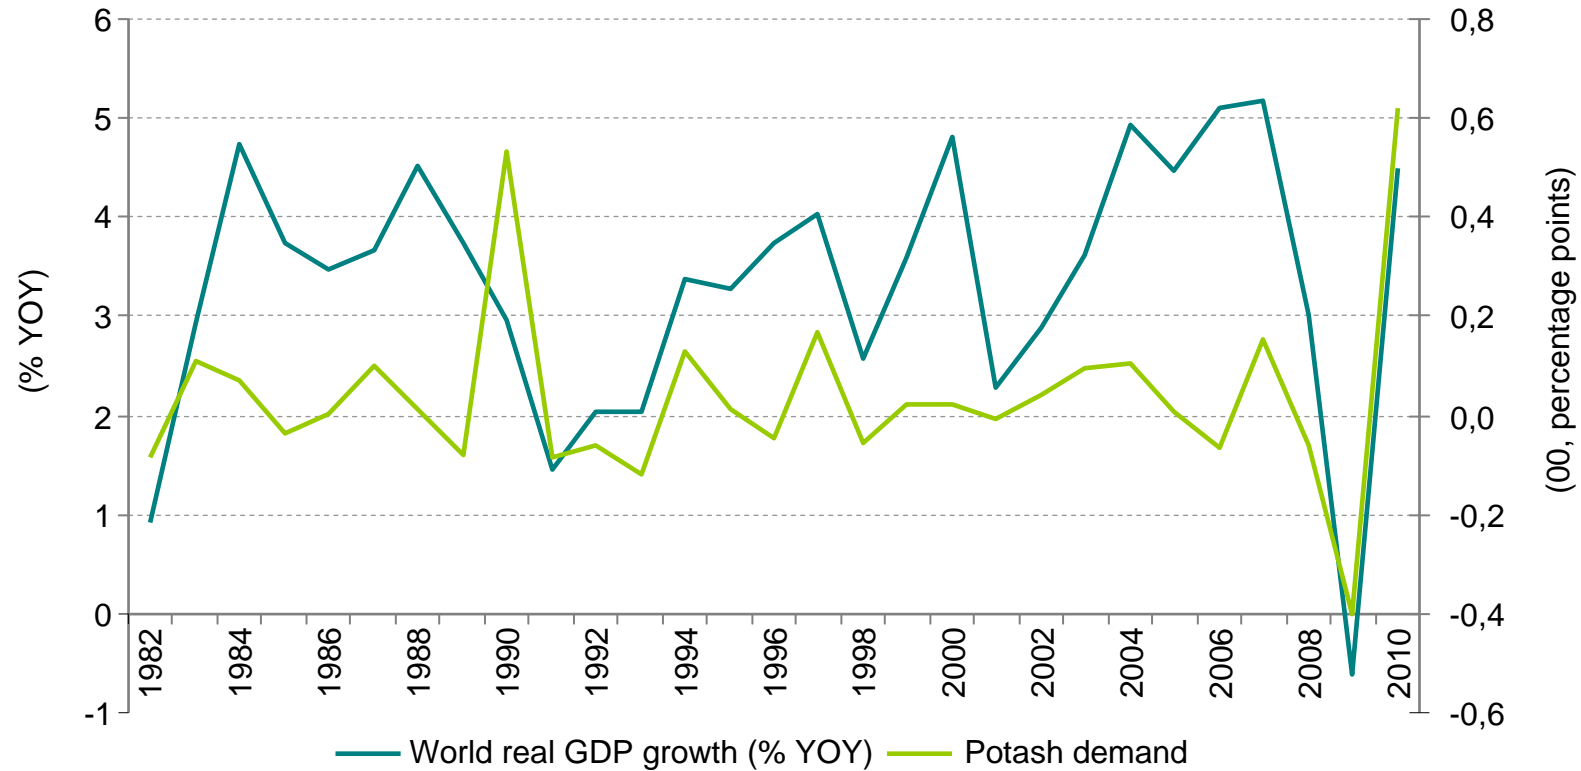

- 1h 2010 Capex split ~ 56/44 expansion/maintenance
- 8.8 bln RUR – total amount of compensation related to Mine-1 flooding (2.3 bln RUR paid in April 2009, 5.5 bln RUR in December 2009, 1 bln RUR is expected to be paid in 2010)
- 100% of bank loans are in US\$, with an average interest rate of app. 3.31%

	2009	1h 2010
	US\$ mln	US\$ mln
Debt (bank loans)	445	468
Cash	142	163
Net Cash (Debt)	(303)	(305)

Agenda

- 1H 2010 Financial Results
- Potash Market Outlook

Potash Demand Recovery Reflects Improving Global Economy

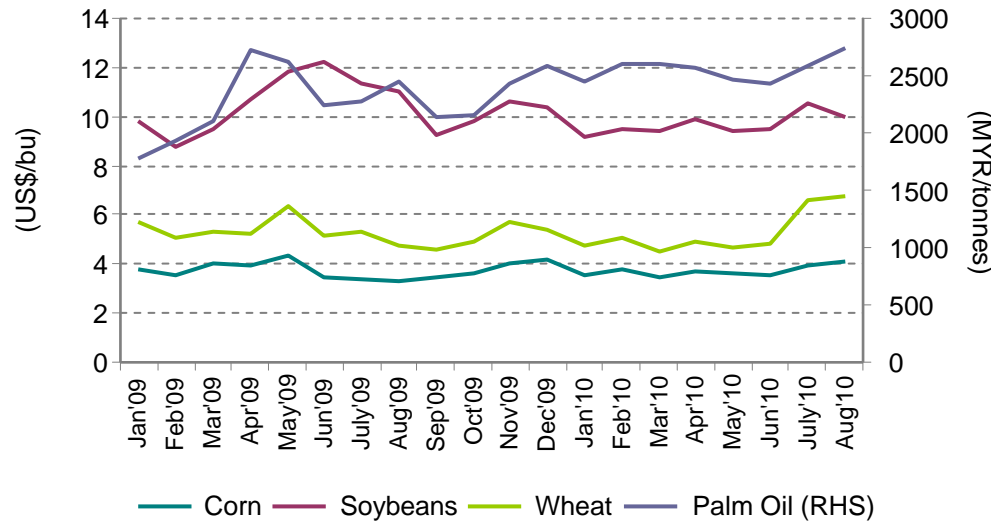

Source: IMF (Jul 2010), IFA, BPC

- Potash demand now recovering following the sharp fall seen in 2009, driven by both the global economic recovery and rising agricultural commodity prices
- Potash demand expected to grow by about 62% (IFA) this year (IMF statistics show that the global economy is projected to rise 4.5% yoy in 2010)

2010: A Year of Rising Crop Prices

Futures Prices

- Prices of major crops have risen due to unfavorable weather conditions and expectations of shortages, especially in the wheat market
- Russia's export ban and the risk of similar bans in the Ukraine have also put upward pressure on prices
- Stocks-to-use ratios of major crops are expected to decline in 2010/2011

Source: CBOT, Bursa Malaysia

Corn stock-to-use ratio

Source: USDA

Soybeans stock-to-use ratio

Source: USDA

Wheat stock-to-use ratio

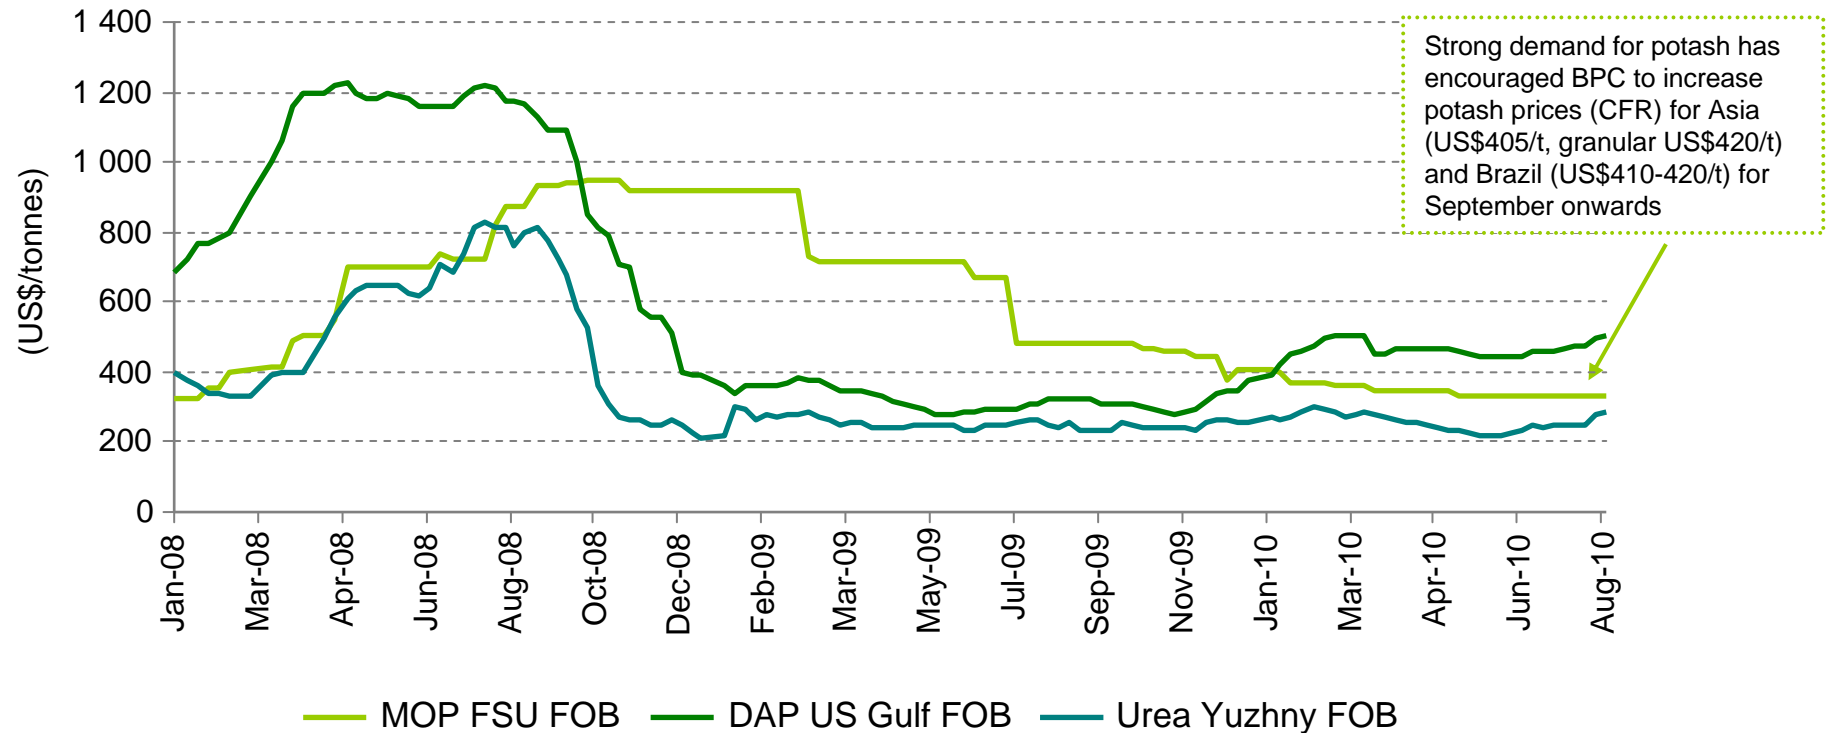

Source: USDA

Rebound in Potash Demand in 2010E

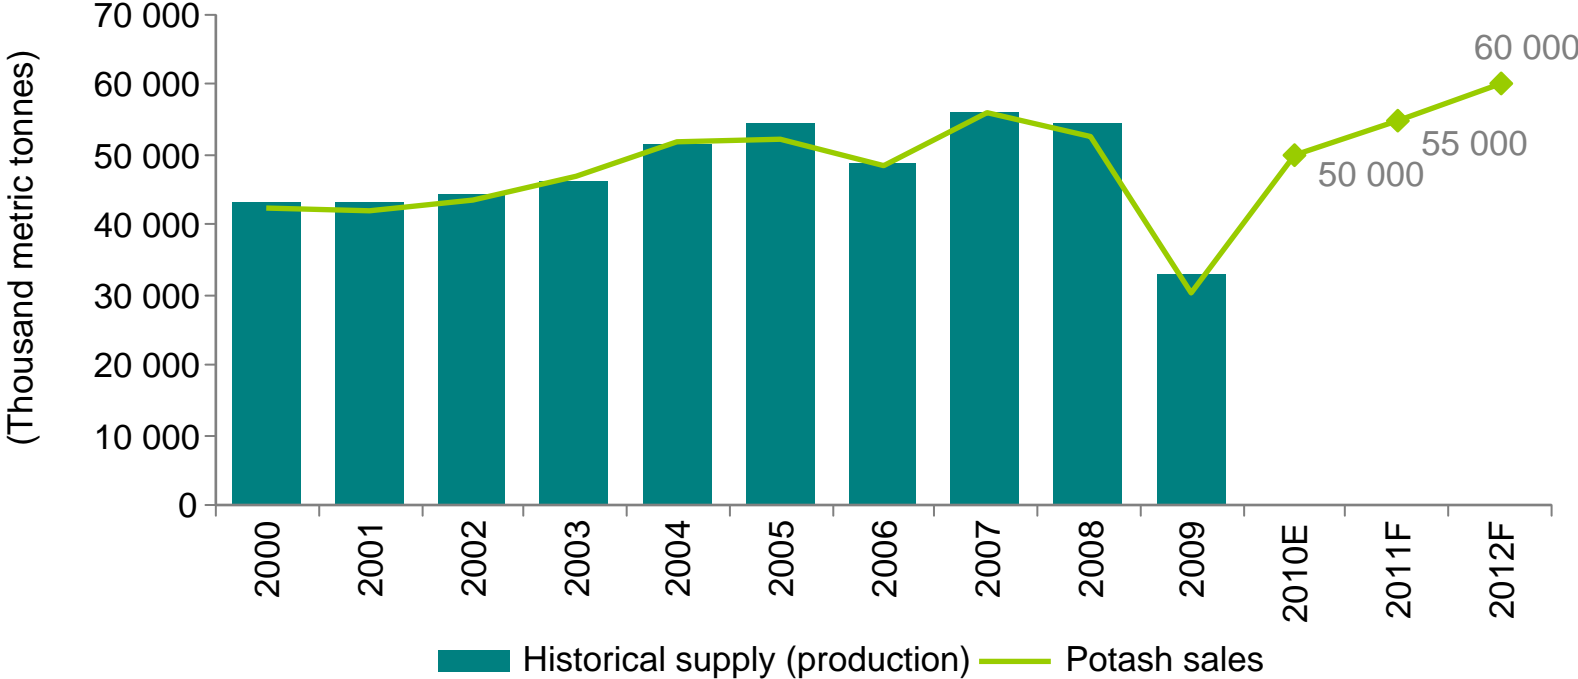

Global Trends in Fertilizer Prices

Source: FMB

- Potash prices remained steady in 1H 2010
- A strong anticipated fall in dealer application and restocking levels should provide further support to the Potash price

Potash Sales are Expected to Show a Firm Rebound

Source: IFA, BPC

- Demand recovery is consistent with our expectations that global shipments in 2010 will increase to around 50 million metric tonnes

Market Outlook

-
- Following two years of consecutive declines, potash demand is expected to show a solid recovery in 2010, to be followed by sustained demand in the long-term
-
- Grain prices and operating rates are the main factors that will dictate how quickly pricing potential is restored for the Potash industry. Since the beginning of the year, these indicators have been positive and low stock-to-use ratios suggest that these factors are likely to improve further
-
- Potential M&A could bring new dynamics to the industry. Greenfield projects being developed by junior companies could be cancelled due to difficulties in raising capital
-

Thank You!
